

# STEMI KEY FINDINGS

FASTFACTS 2023

STEMI

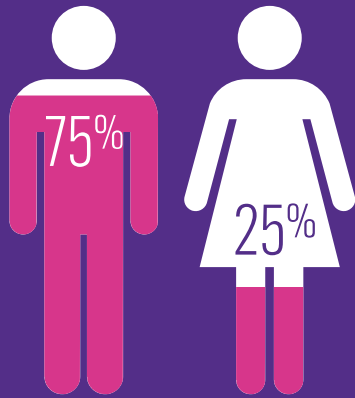

63 yrs

Overall PCI Cohort

67 yrs

The **STEMI cohort was younger** than the overall PCI cohort by an **average of 4 years** (63 years vs 67 years)

**Males accounted for 75%** of the STEMI cohort

In **76.6%** of STEMI cases, a door to PCI mediated reperfusion time of **≤90 minutes was achieved**

The median door to PCI mediated reperfusion time for STEMI was **57 minutes**

A median door to **PCI mediated reperfusion time of 47 minutes** was achieved, when the ambulance service notified the hospital of the imminent arrival of an acute STEMI patient

The majority of hospitals (90%) achieved a median **door to PCI mediated reperfusion time ≤90 minutes**
